

## OneCAD Grows Bigger than Ever!

The sales & marketing efforts that kept OneCAD Solutions' name out there during the recession has paid off in that OneCAD has grown to its largest size ever. **OneCAD now has over 20 technical staff available for our client's projects.** While our main service is still helping our clients with their overflow engineering design and CAD work, OneCAD is also taking on original product design work & professional engineering services. Though our client profile is diverse ranging from machine design to electronic systems and from energy systems to consumer products, OneCAD's mandate remains the same as ever - we help our clients stay on time, on spec & on budget.

**OneCAD Solutions - Ready when you need us!**

### Staff Profile

Peter Li

OneCAD's  
Engineering  
Manager

Peter oversees multiple projects as he manages both our in-house team and our on-site staff when they are assigned to our client's location.

Peter started as one of our first new hires for our design services back in January 2007. He successfully demonstrated his leadership and technical abilities that quickly put him in the position as our Engineering Manager. **Peter's eye for detail and high quality standards ensures that OneCAD consistently meets our clients' needs**

Peter has both a mechanical engineering degree from Jilin University, China and a diploma in mechanical engineering design from Centennial College, Toronto. Peter is currently pursuing his Masters of Engineering on a part-time basis at Ryerson University, Toronto and is an Engineer in Training (EIT) with the Professional Engineers of Ontario.

### Client Profile

OneCAD off to Mumbai, India for Blastwall installation

Blastwall, a OneCAD client, produces a unique all-fibreglass fence engineered with the structural strength to withstand a jet takeoff yet it remains invisible to radar and radio transmissions.

(see [blastwall.com](http://blastwall.com))

OneCAD is Blastwall's "remote" engineering department. OneCAD has performed engineering for Blastwall's installations for a Chicago, a New Jersey and a New Zealand airport, but this will be the first time that OneCAD will also be responsible for on-site supervision of the installation.

A OneCAD staff member will be in Mumbai this coming May to supervise the installation of a new 250 foot fence engineered and manufactured here in Ontario.

### Did you know...

OneCAD Solutions offers mechanical engineering contract design services with the following mid-range CAD software:

AutoCAD

Autodesk  
Inventor

## Can We Help?

### Sharing Information, Advice & Networking Contacts

At OneCAD we firmly believe in the old adage *"What goes around, comes around"*. Networking and sharing information without expectation has helped OneCAD succeed. We have in fact found it to be one of our best marketing tools.

OneCAD is an active member of multiple trade organizations and we attend & exhibit at numerous manufacturing and engineering tradeshow and conferences. We stay abreast of the latest technology and practices for design and manufacturing and we have a network of manufacturing clients.

**Please do not hesitate to give us a call** if we can help by sharing our knowledge and connections to industry, technology and government. As we said "What goes around..."
